*All technical points of contact are strongly encouraged to opt-in as critical service and technology updates will be shared here.*

## What's New in the Telecom Industry?

OneWeb has successfully launched the remainder of their satellites to provide LEO service. Target availability is slated to begin late Q3/early Q4 and will be available through Expedition Communications.

OneWeb will offer an alternative to Starlink that is unique because the network was built specifically for enterprise, government, and first responders - this means zero contending with residential traffic.

Be the first to know when this is available – **sign up for more information**.
