

Keeping Organizations Connected

Our end-to-end Satcom solutions connect more than 20,000 site locations and over 200,000 devices globally.

LEARN MORE

Energy & Utilities

Like communication systems, energy transfers via a global network. That means that the infrastructure connecting that network must traverse the globe. From ocean-based oil rigs in the Gulf of Mexico to solar farms in the Mohave desert, our teams and VSAT terminals are designed to meet remote connectivity needs.

SOLUTIONS & SERVICES

First Responder Priority Internet Plans

High-speed, reliable, and prioritized – our internet plans are designed to meet the unique challenges faced by First Responders and emergency services.

Installation & Maintenance

Field Services for all your satellite, cellular data, and SD-WAN needs - from system installations to on-going network maintenance.

Emergency Satellite Rentals

Need fast, reliable internet during disaster response? Explore our short & long-term satellite rentals for businesses & emergency teams.

PRODUCTS HIGHLIGHTS

The RDS Global Internet Benefits

Enjoy the simplicity of our easy-to-use terminals and the extent of our coverage. Check out some of the benefits here:

Low Cost

Data rates up to 20x higher than legacy MSS solutions at a fraction of the cost.

Uninterrupted Connectivity

Ideal for remote field operations, even in the most hostile and isolated locations.

Seamless Integration

Enables a network of networks through seamless integration with existing terrestrial wireless networks.

24/7 NOC

Round-the-clock access to technical support and 24/7 Network Operations Centers.

Flexible Plans

Flexible plans sold by the gigabyte with cost-effective service and hardware bundle options.

Easy-to-Use Terminals

Portfolio of certified, easy-to-use COTM & COTP terminals for rapid deployment.

Enables two primary use cases: COTM and COTP

Comms-on-the-Move (COTM) allows seamless connectivity while in motion, catering to scenarios such as mobile military operations, maritime communication, and vehicular networks. On the other hand, **Comms-on-the-Pause (COTP)** provides reliable communication during stationary periods, supporting activities like emergency response, temporary deployments, and remote operations.

We ensure that communication remains constant and efficient, regardless of location or circumstances.

Easy-to-Use Terminals

Unlock rapid connectivity deployment with user-friendly, easy-to-use, and certified COTM & COTP terminals:

COMMS-ON-THE-MOVE

COMMS-ON-THE-PAUSE

Comms-on-the-Move (COTM) uses a vehicle-mounted satellite antenna that automatically acquires a connection and maintains communication while a vehicle is moving.

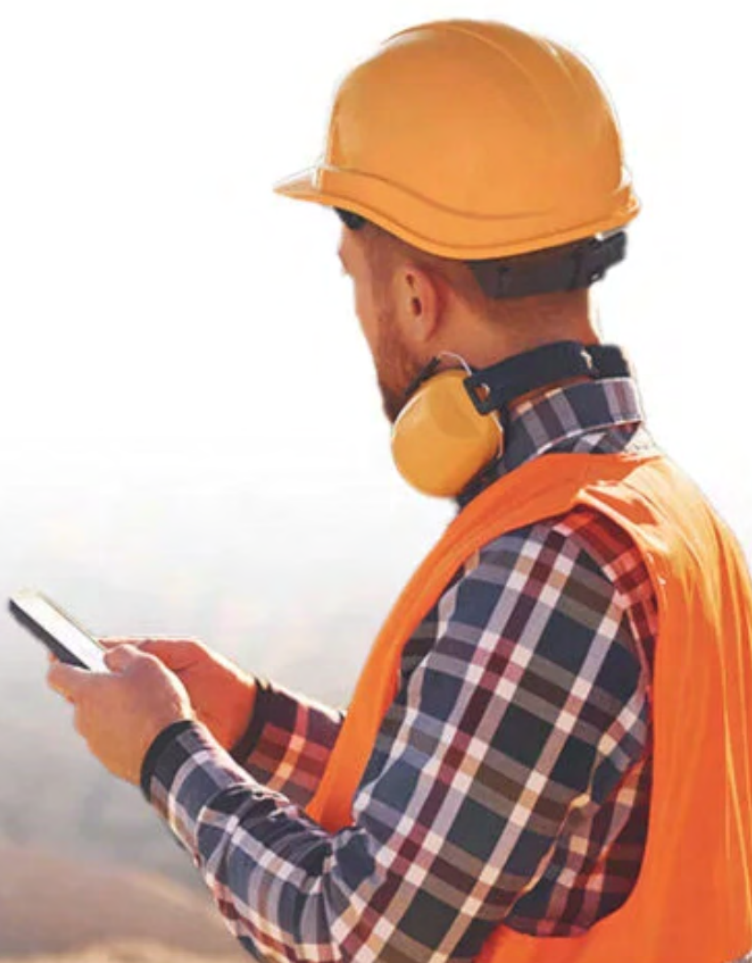

Never lose touch or visibility of your operations with RDS Global Internet

For the first time, easy-to-deploy, affordable high-speed satellite internet at your fingertips.

- ✓ Quickly respond to your team's communications needs
- ✓ Enable reliable global access to mission-critical applications
- ✓ Modernize your communication fleet with the latest technology

INSTALLATION AND MAINTENANCE

Field Support for Installations & Maintenance Where and When you Need It

Providing seamless, scalable solutions for VSAT and large satellite projects across the US, Alaska, Hawaii, and the Caribbean.

Unmatched Field Support for Your Satellite Needs

Often robust field support for VSAT and larger satellite installation and maintenance can be hard to come by – but not at Expedition Communications. Customers often experience issues with the ability to scale projects or have issues coordinating multiple vendors. That's where Expedition Communications can help. By having a field workforce that covers the Continental US, Alaska, Hawaii, and the Caribbean, the team can assist where and when you need them. Expedition Communications has experience working on projects as small as a single terminal to nationwide network rollouts, repoints, and cellular booster projects.

Maintenance Plans

All of our maintenance and support plans simplify the day-to-day needs of our clients. By offering robust plans executed by trained technical team members, clients receive the benefit of having on-site service without the added expense of a full-time team member.

Annual Maintenance Plans for Auto-Deploys

- ✦ **Available Tiers:** Silver, Gold, Platinum
- 📋 **Features Included:**
 - Site visits for break/fix incidents
 - Spares for critical communication parts
 - One annual preventative maintenance visit
- 💰 **Pricing:** Starts from \$3,995/year

Fixed Monthly Maintenance Plans

- ✦ **Available Tiers:** Silver, Gold, Platinum
- 📋 **Features Included:**
 - Site visits for break/fix incidents
 - Spares for critical communication parts
- 💰 **Pricing:** Starts from \$24.95/month

On-Demand Maintenance Visits

- 🔧 **Service Type:** Best effort turnaround, unless booked as an expedite
- 📋 **Features Included:**
 - On-demand service for a single terminal
 - Can be used for break/fix visits
 - Critical communications spares provided only if under warranty
 - Visits can also be used for a stand-alone annual preventative maintenance visit
- 💰 **Pricing:** Please [contact us](#) to learn more about our pricing

Telecommunications Installation & Maintenance Experts

Downtime and other challenges cut into a customer's bottom line. This leads to dissatisfaction. With Expedition Communications clients benefit from:

- VSAT systems, fixed or mobile
- Satellite antenna systems, up to 18 Meters
- Expertise in: Ka-Band, Ku-Band, C-Band, L-Band, X-Band
- Satellite peaking and repoints
- SD-WAN and WiFi network projects
- On-demand maintenance
- Standard and custom maintenance plan agreements

Skilled Installation & Maintenance Teams

With Expedition Communications clients benefit from:

- End-to-end telecommunications solutions under one roof
- A global team of GVF Certified Engineers & Technicians
- Support staff that speaks multiple languages
- Individuals with an average of 15 years of experience
- Expertise across verticals and technical elements
- Access to technical support and rapid response teams
- And 24/7 Network Operations Centers
